

Patient Participation Group

You can make a difference at Richmond

What is it?

A small independent group of volunteer patients who work with the practice to give feedback, improve local services, and represent patient views. The group discusses practice wide issues affecting all patients rather than individual medical concerns. The group meets every few months at the practice. It involves up to 15 patients, practice staff, and is lead by a patient chairperson.

I'm interested – how do I join?

Any registered patient is welcome to join the group. If interested, please contact the current Chairperson (**Mr Larry Angel - angellarry1@aol.com**) or speak to reception to find out about the next meeting. If you cannot attend the group in person, minutes can be shared with you.
